

More Scientists We've Supported

Dr. Barbara Jung

Division of Gastroenterology and Hepatology

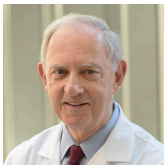

Dr. Jung received IDPF support to complete research focusing on preventing colon cancer and understanding the mechanisms that lead to its development and spread.

Dr. David Bentrem

Department of Surgery

Dr. Bentrem's oncology projects examine the role of the tumor microenvironment in pancreas and colon cancer. With the support of IDPF, Dr. Bentrem investigated the role of inflammation and the cross talk between inflammatory cells and cancer cells.

Dr. Robert Bonow

Department of Cardiology

Dr. Bonow is one of the lead faculty members in Northwestern's Department of Cardiology and the Heart Valve Disease Research Program. He received IDPF support through the IDP Cardiac Research Innovation Grants.

Dr. Maha Hussain & Dr. Edward Schaeffer

Departments of Hematology and Oncology & Urology

IDPF provided Dr. Schaeffer and Dr. Hussain an opportunity to showcase their urological cancer research program to prospective donors and urology faculty.
